

Page Pulse Architecture Document

Task B scale design: 10,000 audits/day, 500 concurrent bursts, customer-facing SLA.

PAGEPULSE.RUN / TASK B

Production architecture for bursty URL audits

Fast cache hits stay synchronous. Slow third-party origins become queued work before they break the SLA.

Built for Digital Heroes Training Task

10K AUDITS/DAY | 500 CONCURRENT BURST | CUSTOMER-FACING SLA
